October 2021- June 2025.

Project History/Experience

Job- Programmer /Developer -SMat Verse Studio

Nov2024-Dec2025

- ❖ **Objectives** – To lead development and code the given project fully, making required systems and a code document for structure.
- **Tools Used** – Unreal engine + CPP.
 - **Outcome** – Made User friendly Back-end systems with editor utilities that act as an interface between inventory and its items.
 - Made Inventory system, Client-Side Prediction for movement and diverse movement capabilities (such as slide, prone, mantle etc.), Made tools and modules for respective mechanics such as 2D Vector Curve graph for weapon recoil.
 - **Platform** – PC.

Job- Mentor

Jan2023-Aug2025

- ❖ **Objectives** – To design and teach a course for Unreal Blueprints and programming that offers a diploma.
- **Tools Used** – Unreal engine, Zoom, Discord.
 - **Outcome** – I designed a beginner to advanced level course mentoring over 150 students to its completion overlooking their assignments and diploma for so.
 - **Platform** – <https://www.gamer2maker.in/>

Game Name- Kenospic : After Wars

Ongoing

- ❖ **Objectives** – To develop a fully polished multiplayer first person shooter with unique game modes.
- **Tools Used** – Unreal engine, Substance Painter, Cascadeur , Steam and Playfab Database.
 - **Outcome** – Made a Multiplayer FPS project with database integration that allows players to sign in, host and join servers with a server browser and play in a map with their chosen game mode.

- Implemented Client-side prediction, hit-confirmation, procedural terrain generation, burst buffers and diverse movement modes with custom optimization for networking.

Devlog - [Devlog](#)

Game Name- Grandpa Wars

Jan 2023

- ❖ **Objectives** –To make a multiplayer game within a month.
 - **Tools Used** – Unreal Engine, Marmoset Hexels
 - **Outcome** – Made a goofy multiplayer game within a month or a bit more that I could enjoy with my friends
 - **Download URL-** [Game Download](#)

Other Experience

Apart from possessing interest in game development, I also take part in management of a textile business (family owned). Furthermore, I also love writing books and have an immense amount of curiosity and attachment to art. I also perform other creative hobbies such as embroidery time to time and creative coding.

My Work:

- ❖ [Book written by me](#)
- ❖ [My Art Profile](#)

Miscellaneous

- I love playing all kinds of games ranging from indie 2D story visual novels to competitive first-person shooters
- Games that I enjoy- Battlefield 1, Pavlov VR, Blade and Sorcery VR, VRChat, Rainbow six siege, Rust, Oxenfree, Life is strange, Phasmophobia, Kingdom Classic, Bad north.
